

Dear EPAL member,

Join Pallet Control Tower today for free and receive all requests from your region.

On Friday, June 30, we presented ourselves to the annual meeting of the international EPAL members in Amsterdam. As a new member, we introduced Pallet Control Tower – the European 24/7 online platform for Collection, Delivery and Matching of EPAL Euro pallets and other RTIs including materialization via our e-Credit system.

PCT Online sorts for the new European directives for the packaging industry. A system that facilitates online matching of pallets between depot / trader / manufacturer, transporter / DC and end user without hassle. With a valuation system based on the EUWID and without unnecessary physical transport thanks to our VAT-free e-Credit system. A durable system with account & quality managers to resolve disputes on the spot. No more unnecessary waiting times for drivers and a better grip on appointments, quality, and costs. Connection to your existing logistics ICT systems. And... thanks to our self-billing system payment within 8 days.

Check out our [website](https://www.palletcontroltower.eu) (<https://www.palletcontroltower.eu>) for more information and activate your account for free. If you have any questions, please call +31 (0)85 – 303 11 30.

It is not for nothing that we say: PCT – the easy way

Yours sincerely,

Bart Meijnen, CEO/director
